

CHM Beta

Product Requirements Document for the beta release of the CHM platform: public site, HCP member app, live programs and honoraria, content library, and the admin and reporting console.

What changed in v2.0 (Updated)

- Auth is on **Amazon Cognito** with optional TOTP or SMS MFA (GoTrue retired for end users).
- Honoraria move from **Bill.com** to **Stripe Connect** (ACH only; paper checks dropped).
- New **Reports** console at `/admin/reports` : link programs to Hub campaigns and generate executive PDF reports.
- Platform and Content Hub talk over **Cognito M2M** (client credentials) with scoped access.
- Native surveys and survey analytics replace JotForm for new programs.

Document	CHM Beta PRD
Version	2.0 (Updated)
Date	September 29, 2026
Status	Draft for review
Owner	Uche Aduaka (CHT Platform)
Reviewers	CHM leadership, CHT engineering, Content Hub (MediaHub) engineering, Compliance, Finance
Companion docs	FRS (docs/FRS-functional-requirements-specification.md), Roadmap (docs/reports/CHM-Platform-Roadmap-Plan.md), Architecture (docs/engineering/architecture.md)

Contents

1	Summary	8	Non-functional requirements
2	Problem and goals	9	Architecture and integrations
3	Users and personas	10	Release plan
4	Beta scope	11	Risks and mitigations
5	Success metrics	12	Open questions
6	Functional requirements	13	Appendix
7	Reports console (new)	14	Approval

Status: **Shipped** live on dev/testapp, **In beta** built, hardening during beta, **Planned** committed for beta but not yet built. Priority: **P0** required for beta launch, **P1** expected during beta, **P2** nice to have.

1 Summary

CHM (Community Health Media) connects oncology healthcare professionals (HCPs), key and digital opinion leaders (KOLs/DOLs), and pharma sponsors through live CME-style programs, a clinical conversation library, podcasts, and paid participation. The CHT platform is the product that delivers this: a public marketing and catalog site, an authenticated member app for HCPs, and an admin console for CHM operations.

The **beta** is the first release where the whole loop runs end to end on CHT-owned infrastructure: an HCP discovers a program, registers, attends in Zoom, completes a survey, gets paid, and CHM reports the outcome back to the sponsor. This document defines what the beta must do, how we will measure it, and what is explicitly deferred.

2 Problem and goals

Problems today

- **Fragmented tools.** Registration, attendance, surveys, payouts and reporting lived across Zoom, JotForm, Bill.com and spreadsheets, with manual reconciliation between them.
- **Identity owned elsewhere.** End users authenticated against MediaHub GoTrue, coupling CHT sign-in to a separate system and blocking MFA and compliance controls.
- **Slow sponsor reporting.** Executive reports were assembled by hand or through a synchronous endpoint that timed out, and HTML output was not client-ready.
- **Payout friction.** Bill.com sessions, vendor setup and paper checks slowed honoraria and created support load.

Beta goals

G1 · ONE LOOP

Registration → attendance → survey → payment → report runs without manual hand-offs for a standard program.

G2 · TRUSTED IDENTITY

All users on Cognito with MFA available; admin actions audited; no secrets or tokens in logs.

G3 · FAST, SAFE PAYOUTS

Eligible HCPs are paid by ACH through Stripe Connect with tax details collected in onboarding.

G4 · SPONSOR-READY REPORTING

Admins generate a printed PDF executive report for any campaign in minutes, without seeing raw HTML or storage URLs.

Non-goals for beta

- Native mobile apps (responsive web only).
- Self-serve sponsor portal (sponsors receive PDFs; no sponsor log-in in beta).
- Paper checks or non-US payouts.
- Accredited CME certificate issuance beyond the existing certificate worker.

3 Users and personas

Persona	Who	Primary jobs in beta	Surface
HCP member	Oncologists, PCPs, NPs/PAs, pharmacists with an NPI	Find and register for sessions, attend, complete surveys, get paid, watch clips and podcasts	/app
KOL / DOL	Faculty and digital opinion leaders	Appear in the KOL network, host sessions, receive honoraria	/kol-network , /app
Visitor	Unauthenticated HCPs and partners	Browse catalog, KOLs, podcasts and upcoming programs; join	Public site
CHM admin / ops	Program managers, finance, content	Schedule programs, approve registrations, manage surveys and payments, generate reports	/admin
Pharma sponsor	Brand and medical affairs teams	Receive executive PDF reports and campaign results (offline in beta)	PDF delivery

4 Beta scope

IN SCOPE

- Public site, catalog, KOL network, podcast network
- Join, login, Google sign-in, MFA, profile completion (NPI)
- Webinars and CHM Office Hours: register, multi-register, in-app Zoom, approvals
- Native intake and post-event surveys with analytics
- Honoraria via Stripe Connect (ACH) with admin Pay-now
- Admin console: programs hub, schedulers, users, HCP explorer, payments, audit log, Zoom recordings, campaigns funnel
- Reports console: campaign links, analytics report, executive PDF reports
- Chatbot (CHM assistant) for members

OUT OF SCOPE / DEFERRED

- Sponsor log-in and self-serve dashboards
- Paper checks, international payouts
- HTML report delivery (PDF only)
- Report version history UI beyond regenerate (v1...v3)
- Native mobile apps
- MediaHub move onto CHT ECS (roadmap Phase 4)
- Catalog Redis cache (roadmap Phase 4e)

5 Success metrics

Targets to confirm

Targets below are proposed starting points for the beta review. Leadership to confirm before launch.

Metric	Definition	Beta target
Registration completion	Registrations submitted ÷ registration wizards started	≥ 70%
Attendance match rate	Attendees auto-matched to a registration via Zoom email ÷ all attendees	≥ 90%
Survey completion	Post-event surveys submitted ÷ verified attendees	≥ 80%
Time to payout	Median time from survey submission to Stripe transfer initiated	≤ 5 business days
Report turnaround	Median time from "Generate report" to PDF ready	≤ 10 minutes
Report first-pass acceptance	Reports downloaded without a regenerate	≥ 60%
MFA adoption	Active members with MFA enrolled	≥ 50% members, 100% admins

Metric	Definition	Beta target
Reliability	API 5xx rate on <code>/api</code> (excluding upstream outages)	< 0.5% of requests

6 Functional requirements

Requirement IDs map to the FRS where one exists. Detailed error and edge-case behavior lives in the FRS; this section states what the beta must deliver and its current status.

6.1 Accounts and access

ID	Requirement	Priority	Status
AUTH-1	Email and password sign-up (<code>/join</code>) and log-in via Cognito; sessions are httpOnly cookies backed by Postgres.	P0	Shipped
AUTH-2	Google sign-in via Cognito Hosted UI, linked to the existing account by email.	P0	Shipped
AUTH-3	MFA with TOTP or SMS; members can enroll after joining (<code>/mfa/setup</code>); SMS code prefilled from profile phone.	P0	Shipped
AUTH-4	Profile completion gate (<code>/complete-profile</code>) for profession, NPI, institution, city, state and ZIP before protected actions.	P0	Shipped
AUTH-5	Forgot and reset password, email verification; responses never reveal whether an email exists.	P0	Shipped
AUTH-6	Bot protection with reCAPTCHA v3 on login and join, plus Cognito WAF.	P1	Shipped
AUTH-7	Role-based access: <code>/admin</code> requires the ADMIN role; server enforces on every admin API.	P0	Shipped
AUTH-8	Server-side session revocation on logout and password change; 401s return the user to log-in.	P1	Shipped

6.2 Public site and discovery

ID	Requirement	Priority	Status
PUB-1	Marketing pages: home, about, services, what we do, for HCPs, portfolios, contact, privacy, terms.	P0	Shipped
PUB-2	Public catalog: disease areas, playlists, series, clip detail with YouTube playback and related clips.	P0	Shipped
PUB-3	KOL network: directory by state and region, curated and verified profile data only, links to the KOL's clips.	P0	Shipped
PUB-4	Podcast network: show pages and episode playback.	P1	Shipped

ID	Requirement	Priority	Status
PUB-5	Upcoming programs: webinars and office hours listings with detail pages and a registration call to action.	P0	Shipped
PUB-6	Search across clips, sessions and surveys; legacy URLs (/webinars , /watch) redirect.	P1	Shipped

6.3 Live programs

ID	Requirement	Priority	Status
PROG-1	Admins schedule webinars and office hours; the backend creates the Zoom webinar or meeting and stores it.	P0	Shipped
PROG-2	Registration wizard: intake survey, time slot where applicable, attestations; draft survives refresh.	P0	Shipped
PROG-3	Register for several programs in one flow (/app/live/register-multiple).	P1	Shipped
PROG-4	Approval workflow: admins approve or reject registrations with a reason email; approved HCPs receive join details.	P0	Shipped
PROG-5	In-app Zoom session page (Meeting SDK) with auto-join and clean teardown on exit.	P1	In beta
PROG-6	Attendance recorded automatically from Zoom when the attendee email matches the HCP account.	P0	Shipped
PROG-7	Post-event flow: survey then payout details then done, resumable from server state.	P0	Shipped
PROG-8	Zoom recordings catalog and transcript (VTT) export to S3 with Hub notification.	P1	Shipped

6.4 Surveys

ID	Requirement	Priority	Status
SURV-1	Native survey builder for intake, feedback, pre-test and post-test surveys; reusable across programs.	P0	Shipped
SURV-2	Profile prefill for untouched answers; drafts preserved.	P1	Shipped
SURV-3	Post-event survey unlocks after verified attendance and closes after a set window.	P0	Shipped
SURV-4	Response analytics: choice distributions, per-question summaries, CSV export.	P1	Shipped
SURV-5	JotForm remains supported for legacy programs only.	P2	Shipped

6.5 Honoraria and payments

ID	Requirement	Priority	Status
PAY-1	Eligibility: attendance verified, survey acknowledged, and tax details complete before a payment is queued.	P0	Shipped
PAY-2	Stripe Connect embedded onboarding (recipient account); legal name or business entity, bank account and TIN collected by Stripe.	P0	In beta
PAY-3	ACH payouts only; users previously paid by check must re-onboard with a bank account.	P0	In beta
PAY-4	Admin payment queue with Pay-now, status tracking and reconciliation; irreversible actions confirmed and audited.	P0	Shipped
PAY-5	Member earnings and payment history pages with clear statuses.	P0	Shipped
PAY-6	Cut over per environment with no dual-run: dev, then testapp, then production.	P0	Planned

6.6 Member app

ID	Requirement	Priority	Status
APP-1	Dashboard with onboarding, spotlight carousel, upcoming sessions, open surveys and catalog rows.	P0	Shipped
APP-2	In-app catalog, playlists, KOL network and podcasts with watch tracking.	P0	Shipped
APP-3	Settings: profile, notifications, security (password, MFA).	P0	Shipped
APP-4	Notification bell for missing profile items and MFA reminder, once per session.	P1	Shipped
APP-5	CHM assistant chatbot with usage disclaimers; authenticated through the backend.	P2	In beta

6.7 Admin console

ID	Requirement	Priority	Status
ADM-1	Program hub per program: registrations, attendance, survey responses (CSV), operational email, invites.	P0	Shipped
ADM-2	Users and HCP explorer with role changes, suspension and PII safeguards.	P0	Shipped
ADM-3	Audit log of admin actions (actor, action, resource, IP, user agent).	P0	Shipped
ADM-4	Campaigns funnel and campaigns dashboard for HubSpot-sourced campaigns.	P1	Shipped
ADM-5	Content management: WordPress posts and disease areas feeding the catalog.	P1	Shipped
ADM-6	Rx analytics views respecting data governance thresholds.	P2	In beta

7 Reports console (new)

The Reports console (`/admin/reports` , formerly `/admin/content-hub`) is where CHM admins set up sponsor campaigns, connect their data, and produce reports. It is backed by the Content Hub for campaign data and by the cht-reports pipeline for executive PDFs. Old `/admin/content-hub` links redirect.

The reports API (CPR-30) is merged. The admin UI (CPR-27: program linking, report history, notify picker, route rename) is on dev and marked **In beta** until it merges.

7.1 User flow

1. **Create a campaign** in the Create report wizard: type (analytics or executive PDF), campaign details, data connection (platform CSVs, CHT feedback survey), validation.
2. **Link programs** on the campaign's Programs tab so Zoom sessions, attendance and surveys from Platform are included.
3. **Generate** on the Reports tab: pick a 30, 60 or 90-day window and sources (HubSpot, LinkedIn, Meta, YouTube, Livestream, Zoom sessions, Surveys), optionally choose admins to email.
4. **Track and download**: the request returns immediately; status moves from queued to ready in Report history; download the printed PDF.
5. **Regenerate** with optional instructions (up to 2,000 characters), at most three times per report.

7.2 Requirements

ID	Requirement	Priority	Status
RPT-1	All report endpoints require an admin session; every route is JWT and ADMIN guarded.	P0	Shipped
RPT-2	<code>POST /api/reports</code> validates input, freezes the date window, and returns 202 immediately with the queued report; generation is asynchronous.	P0	Shipped
RPT-3	Only one report per campaign and template generates at a time; a second request returns 409 with a clear message.	P0	Shipped
RPT-4	Report history lists every report for a campaign, newest first, and refreshes every 5 seconds while any report is in progress.	P0	In beta
RPT-5	PDF only. Users only ever receive a printed PDF; HTML output is never shown or downloadable.	P0	Shipped
RPT-6	Downloads are streamed through Platform with a friendly filename; the storage (S3) URL is never exposed to the browser. Keys outside <code>reports/</code> or non-PDF content are rejected.	P0	Shipped
RPT-7	Regenerate is allowed only for completed reports and at most three times; the fourth attempt returns 409.	P0	Shipped
RPT-8	Notify list is limited to active admins, chosen with a type-to-search picker; unknown addresses are rejected.	P1	In beta

ID	Requirement	Priority	Status
RPT-9	Program to campaign linking via a dedicated endpoint that only updates the link (no side effects on surveys or Zoom).	P0	In beta
RPT-10	Analytics report view with KPI tiles, platform breakdowns, validation status and glossary.	P1	Shipped
RPT-11	Report versions (v1, v2, v3) stored under <code>reports/.../vN.pdf</code> and selectable in history.	P2	Planned

7.3 Report lifecycle

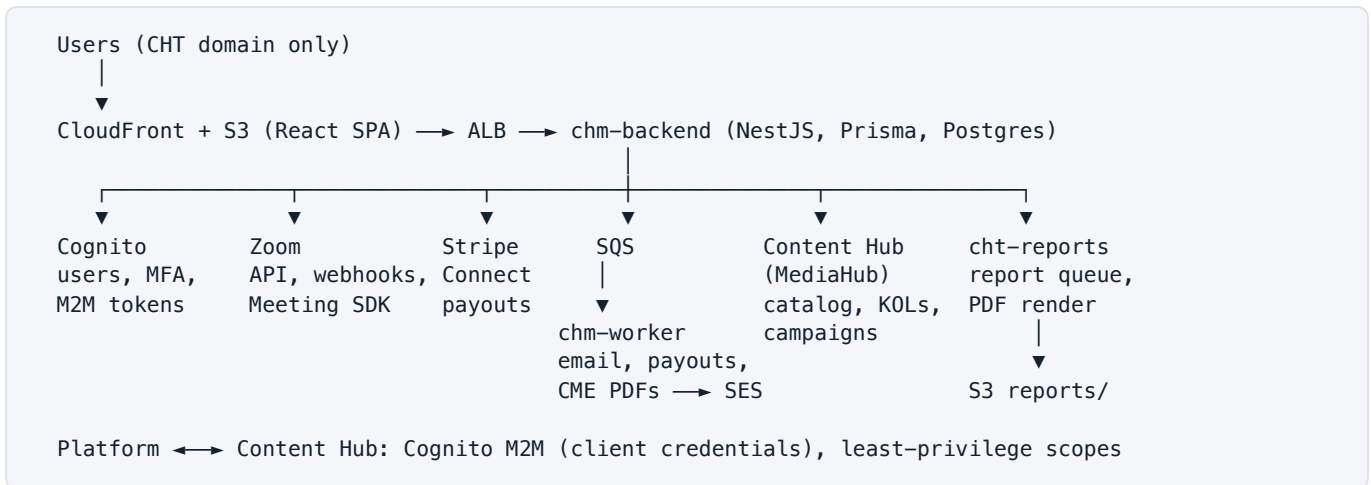

Status	Shown as	Meaning
queued	Queued	Request accepted and sent to the report queue.
pulling_data	Pulling data	Pipeline is gathering sources, including Platform export for linked programs.
generating	Writing report	Narrative and charts are being produced.
rendering	Printing PDF	Report is printed to PDF.
uploading	Saving PDF	PDF is stored under <code>reports/</code> .
complete	Ready	PDF can be downloaded or regenerated.
failed	Failed	Error shown; admin can generate again.

8 Non-functional requirements

Area	Requirement
Security	MFA available to all users and required for admins before launch. httpOnly, secure session cookies. Helmet security headers and HSTS in production. Admin API docs gated by admin session.
Secrets and logging	Tokens, client secrets and Authorization headers are never logged. Logs are structured JSON without emojis. Success and failure of integrations may be logged.
Service-to-service	Platform and Content Hub authenticate with Cognito client credentials and least-privilege scopes (for example <code>hub/reports.read</code> , <code>platform/export.read</code>).
Privacy	No patient data (PHI) is collected. HCP PII (NPI, contact, tax details) is limited to what programs and payouts need; tax details are held by Stripe, not CHT.
Auditability	Admin actions, report requests and payment actions write audit log entries.
Performance	Public pages interactive in under 3 s on broadband; API p95 under 800 ms for reads excluding upstream calls; report requests return in under 1 s.
Availability	Production on ECS Fargate behind an ALB with health checks; RDS backups and documented disaster recovery.

Area	Requirement
Accessibility	WCAG 2.1 AA as the target: visible labels, keyboard access, focus rings, announced errors, 16 px minimum input text on mobile.
Browsers	Latest two versions of Chrome, Safari, Edge and Firefox; iOS Safari and Android Chrome.
Quality gates	Typecheck, lint and unit tests pass for backend and frontend before merge; deploys go dev, then testapp, then production.

9 Architecture and integrations

Integration	Used for	Beta notes
Amazon Cognito	User auth, MFA, Google IdP, service-to-service tokens	Dev and prod pools; M2M clients per service with scoped access
Zoom	Session creation, attendance webhooks, in-app SDK, recordings and transcripts	Server-to-Server OAuth
Stripe Connect	Honorarium payouts and tax detail collection	Replaces Bill.com per environment; ACH only
Content Hub (MediaHub)	Catalog, KOL network, campaigns, analytics	External API until the roadmap moves it onto CHT ECS
cht-reports	Executive report generation and PDF rendering	Consumes the report queue; writes <code>s3_key_pdf</code> under <code>reports/</code>
Amazon SES	Transactional email and report notifications	Sent by the worker
HubSpot	Campaign CRM data	Optional per campaign
YouTube / WordPress	Clip playback, podcasts, editorial content	Read-only

10 Release plan

Stage	Who	Entry criteria	Exit criteria
Dev	CHT engineering	Features merged; checks green	End-to-end loop passes on a test program; report generated and downloaded
Testapp (closed beta)	CHM staff and 10–20 invited HCPs	Stripe test mode connected; report pipeline live	Two real programs run end to end; no open P0 defects
Production (open beta)	All members; selected sponsors receive PDFs	Stripe live cutover; admins on MFA; runbooks signed	Beta metrics reviewed after 30 days; go or no-go for general availability

Launch checklist

- All P0 requirements shipped and verified on testapp.
- Stripe cutover complete for the environment; legacy check users notified to re-onboard.
- Admin accounts enrolled in MFA; audit log reviewed.
- Report pipeline processing jobs, with PDFs under `reports/` and Platform read access to the artifacts bucket.
- Support path and FAQ published for sign-in, MFA, payouts and surveys.
- Incident response and disaster recovery runbooks current.

11 Risks and mitigations

Risk	Impact	Mitigation
HCPs abandon payout re-onboarding after the Stripe switch	Delayed honoraria, support load	In-app prompts, email reminders, clear copy on why re-onboarding is needed
Zoom email mismatch prevents attendance matching	Surveys stay locked, payouts delayed	Registration copy on using the account email; admin override in the program hub
Report pipeline delays or failures	Sponsor deliverables late	Asynchronous generation, visible status, one-click retry, failure alerts
Report data gaps when programs are not linked	Incomplete reports	Warning on the Reports tab and in the wizard; Programs tab with search and link
MFA friction at sign-in	Lower activation	Optional for members during beta, required for admins; SMS and TOTP options
Content Hub dependency outage	Catalog or reports unavailable	Health checks, graceful empty states, 503 with retry messaging

12 Open questions

#	Question	Owner	Needed by
1	Confirm beta success targets in section 5.	CHM leadership	Before testapp beta
2	Should MFA become required for members at general availability?	Product, Compliance	End of beta
3	Production date for the Stripe cutover and communication plan for check users.	Finance, Platform	Before production beta
4	Do sponsors need report version history (v1 to v3) in beta, or is the latest PDF enough?	Product	Mid beta
5	Beta HCP cohort: who is invited and how feedback is collected.	CHM ops	Before testapp beta
6	Timing for moving Content Hub onto CHT infrastructure (roadmap Phase 4).	Engineering	Post beta

13 Appendix

A. Route map

Area	Routes
Public	<code>/home</code> , <code>/about</code> , <code>/services</code> , <code>/what-we-do</code> , <code>/for-hcps</code> , <code>/portfolios</code> , <code>/contact</code> , <code>/privacy</code> , <code>/terms</code>
Catalog	<code>/catalog</code> , <code>/catalog/:diseaseSlug</code> , <code>/catalog/clip/:id</code> , <code>/catalog/playlist/:playlistId</code>
Network	<code>/kol-network</code> , <code>/kol-network/:regionSlug</code> , <code>/kol-network/profile/:kolId</code> , <code>/podcast-network</code>
Programs	<code>/live</code> , <code>/live/:id</code> , <code>/chm-office-hours</code> , <code>/chm-office-hours/:id</code>
Auth	<code>/join</code> , <code>/login</code> , <code>/forgot-password</code> , <code>/reset-password/confirm</code> , <code>/verify-email</code> , <code>/mfa/setup</code> , <code>/complete-profile</code> , <code>/auth/callback</code>
Member app	<code>/app/home</code> , <code>/app/live</code> , <code>/app/chm-office-hours</code> , <code>/app/surveys</code> , <code>/app/catalog</code> , <code>/app/podcasts</code> , <code>/app/earnings</code> , <code>/app/payments</code> , <code>/app/settings</code> , <code>/app/chatbot</code>
Admin	<code>/admin</code> , <code>/admin/programs</code> , <code>/admin/webinar-approvals</code> , <code>/admin/webinar-scheduler</code> , <code>/admin/office-hours-scheduler</code> , <code>/admin/surveys</code> , <code>/admin/payments</code> , <code>/admin/users</code> , <code>/admin/hcp-explorer</code> , <code>/admin/audit-log</code> , <code>/admin/zoom-recordings</code> , <code>/admin/funnel</code> , <code>/admin/campaigns-dashboard</code> , <code>/admin/rx-analytics</code>
Reports	<code>/admin/reports</code> , <code>/admin/reports/new</code> , <code>/admin/reports/campaigns/:id?tab=reports programs sources validation settings</code> , <code>/admin/reports/campaigns/:id/report</code>

B. Glossary

Term	Meaning
HCP	Healthcare professional, identified by NPI.
KOL / DOL	Key opinion leader / digital opinion leader.
Program	A scheduled webinar or office hours session with registration.
Campaign	A sponsor engagement in the Content Hub that groups programs and channel data for reporting.
Executive report	Client-ready PDF summary of a campaign over a chosen window.
M2M	Machine-to-machine authentication using Cognito client credentials.
Honorarium	Payment to an HCP for eligible participation.
